

# LLM Shop - Products Walkthrough

## Goal

Discover products quickly, understand details, and add items you like to the cart with minimal friction.

## How to get there

- From the navbar, select "Products" to land on the catalog overview.
- The overview shows product cards with name, category, image, and price; it is the fastest way to scan options.

## Browsing the catalog

- Scroll the list and watch prices and categories to narrow down candidates.
- Each card is clickable; opening a card reveals full details such as the description and the main product image.
- Use the card's primary action to add the item to your cart directly without leaving the catalog. Product details page
- The detail view restates the title, category, price, image, and a longer description.
- A dedicated "Add to cart" action is present here too; use it if you want to confirm details before adding.
- After adding, a confirmation should appear, and your cart count will reflect the change.

## Admin-specific actions

- If you are an admin, additional routes are available from the catalog: create a new product or update existing items.
- These flows keep the product list fresh for shoppers and can be reached via the admin options within the products area.
