

# LLM Shop - Shopping Cart Walkthrough

## Goal

Review everything you intend to buy, fine-tune quantities, and proceed toward checkout with confidence.

## How to get there

- Click the "Cart" link in the navbar to open your current basket.
- The cart reflects every item you added from the Products catalog or from a product detail page.

## Reviewing items

- Each row lists the product name, price, and quantity you selected.
- Totals update automatically; re-open this view anytime to confirm your running cost.

## Adjustments

- Increase or decrease quantities directly in the cart view to match what you need.
- Remove items you no longer want; the line will disappear, and the total will recalculate.
- If something looks off, jump back to the Products page to confirm the item details, then return here.

## Next steps

- When the cart looks right, continue toward checkout to finalize your order.
- You can always return to the cart after checkout to verify changes or start another purchase.
